OTHER PREFERRED ROLES

Full-Stack Developer (1-2 Years)

OBJECTIVE

Front-End Developer with experience building responsive web applications using React, JavaScript, and Tailwind CSS. Skilled in developing intuitive user interfaces, solving complex problems, and collaborating effectively within team environments. Driven by curiosity and a passion for continuous learning, I am committed to refining my technical expertise, embracing new challenges, and contributing to innovative solutions that deliver meaningful user experiences.

FUNCTIONAL SKILLS

Programming Languages & Frameworks: React.js, Next.js, JavaScript, Node. (Express.JS), jQuery, Angular.js, Vue3.js, Bootstrap, Tailwind CSS

Databases: MongoDB, SQL Server Management Studio

Cloud & DevOps: AWS, GitHub

Software Development Practices: SDLC, Object-oriented Programming (OOP)

EXPERIENCE

Software Engineer

CustomApp Cape Town Jul 2021 Feb 2025

Developed and maintained responsive web applications using HTML, CSS, JavaScript, and Bootstrap, delivering intuitive and user-friendly digital experiences.

Integrated software components and APIs to build scalable, fully functional applications that met business and user requirements.

Implemented and consumed RESTful APIs using JSON to enable seamless data exchange between front-end and back-end systems.

Troubleshoot, debugged, and enhanced existing applications, improving performance, reliability, and overall user experience. Designed and optimized T-SQL queries, stored procedures,

and CRUD operations to support efficient data management and application functionality.

Utilized AWS Code Commit for version control, collaborating effectively within development workflows and maintaining code quality.

Configured and managed AWS Route 53 for domain management and website routing, ensuring reliable application accessibility.

Collaborated in Agile team environments, participating in daily stand-ups, sprint planning, and task prioritization to deliver projects on schedule.

Maintained accurate project tracking and documentation, contributing to efficient workflow management and timely project delivery.

Adapted quickly to new technologies and development practices while contributing to innovative solutions across multiple projects
